ADESIVER 406 HV

High viscosity solvent-based contact adhesive

¤Description

ADESIVER 406 HV is a polychloroprene solvent-based double coat adhesive suitable for difficult bonding of laminates, metals, profiles, resilient floor and covings on absorbent or poorly absorbent surfaces where immediately grip and initial tack are required. ADESIVER 406 HV has high thermal resistance and strong initial tack.

Mixture ratio single-component Colour straw yellow Specific weight 0,89 g/ml (**) Application temperature +10°C ÷ +25°C Application plastic smooth trowel / trowel n.1 Maximum open time 15 min (**) Hardening 24 h (**) Coverage 200-400 g/m² Storage stability 12 months (**) Packaging 0,85 kg - 5 kg	#Characteristics	
Specific weight 0,89 g/ml (**) Application temperature +10°C ÷ +25°C Application plastic smooth trowel / trowel n.1 Maximum open time 15 min (**) Hardening 24 h (**) Coverage 200-400 g/m² Storage stability 12 months (2)	Mixture ratio	single-component
Application temperature +10°C ÷ +25°C Application plastic smooth trowel / trowel n.1 Maximum open time 15 min (!) Hardening 24 h (!) Coverage 200-400 g/m² Storage stability 12 months (2)	Colour	straw yellow
Application plastic smooth trowel / trowel n.1 Maximum open time 15 min (!) Hardening 24 h (!) Coverage 200-400 g/m² Storage stability 12 months (2)	Specific weight	0,89 g/ml ⁽¹⁾
Maximum open time 15 min (!) Hardening 24 h (!) Coverage 200-400 g/m² Storage stability 12 months (2)	Application temperature	+10°C ÷ +25°C
Hardening 24 h (*) Coverage 200-400 g/m² Storage stability 12 months (2)	Application	plastic smooth trowel / trowel n.1
Coverage 200-400 g/m² Storage stability 12 months (2)	Maximum open time	15 min ⁽¹⁾
Storage stability 12 months (2)	Hardening	24 h ⁽¹⁾
	Coverage	200-400 g/m²
Packaging 0,85 kg - 5 kg	Storage stability	12 months ⁽²⁾
	Packaging	0,85 kg - 5 kg
Tool cleaning DILUENTE DNE	Tool cleaning	DILUENTE DNE

- 1 at 20°C and 65% R.H.
- 2 in original sealed containers at temperatures between +10°C and +25°C

#How to use

Shake well before use.

Make sure that the materials to be bonded are clean and free of dust, grease, oil residues of other processing (in presence of metal sheet it is recommended to degrease with DILUENTE ACETONE).

Spread an uniform coat of adhesive on both substrates taking into account the degree of absorption of the materials, wait approximately 15 minutes, in order to allow the solvent evaporation, than join and press the two parts.

The gluing is considered concluded after 24 hours.

Notes:Close hermetically the can after use.

Warnings

 ${\it Reshuffle before the use. Store the product room temperature.}$

¤Label elements

 $\cdot For more information about the safe use of the product it is recommended to consult the latest version of the Safety Data Sheet.\\$
