

SERIE VSC

Chimiver solvent-borne mediums for dyes

Description

The VSC series contains all the solvent-borne mediums to be used in the preparation of dyes for wood. Depending on the type of application and the characteristics required, you can choose between different types of mediums.

Characteristics

Appearance	liquid / viscous liquid
Application	brush, rag, spray, roller
Application temperature	10°C - 25°C
Thinning (if necessary)	DLC-0044; DLC-0022; DMC-0070; DNS-0018; DMC-0029
Storage stability	1 year ⁽¹⁾
Packaging	1 L - 5 L - 10 L

¹ in original sealed containers at temperatures between +10°C and +25°C

Available Versions

VSC-0010: Medium viscosity medium for general purpose, specific for spray, spray/rag and sponge roller applications. Medium drying speed.

VSC-0011: High viscosity medium specific for dyes applied with rubber roller. Used in mixture with VSC-0010 to change the viscosity. Quick drying.

VSC-0015: Medium for spray applications where excellent colour uniformity and low pore marking are required.
