

ECOCROM

Single-component polyurethane-acrylic water-based toning primer for wooden floors (solvent effect)

Description

ECOCROM is a single-component water-based super toning primer with high coverage for wooden floors, which could be used as a first coat in the finishing process composed only of water-based finishes. ECOCROM gives the wood a very warm color, especially on oak. Thanks to its formulation ECOCROM extends very well making the application extremely easy. It doesn't leave overlaps and has excellent sanding properties.

Characteristics

Mixture ratio	single-component
VOC %	max 8,75 %
VOC g/L	max 87,46
Application temperature	+50°F ÷ +77°F
Application	0,3 Inch microfiber roller/ brush
Thinning (if necessary)	DILUENTE DR H2O
Coverage	350-400 ft ² /gal
Dust dry	45' ⁽¹⁾
Fingerprint dry	1 h 30' ⁽¹⁾
Sanding	12 h ⁽¹⁾
Overcoating without sanding	2-4 h ⁽¹⁾
Wood oxidation	excellent
Pore filling	good
Storage stability	1 year ⁽²⁾
Packaging	1,3 gal
Tool cleaning	DILUENTE DNH 40 (with fresh product)

1 at 68°F and 65% R.H.

2 in original sealed containers at temperatures between +50°F and +77°F

How to use

ECOCROM should be applied on previously filled, sanded and thoroughly vacuumed wooden floor. After 2/4 hours (in this case without sanding) or after 12/24 hours (in this case sanding with 220 paper grit), apply a second coat of ECOCROM. In order to make the floor evenly toned, it is essential to follow two coats cycle and respect the required coverage parameters. After at least 12 hours, sand with 220 paper grit and apply ECOSTAR, ECOSTAR 2K o ECOTRAFFIK 2K (see technical data sheets) as a finish coat.

Label elements

For more information about the safe use of the product it is recommended to consult the latest version of the Safety Data Sheet.
